

Job offer:

Techn. Employee | Physics Lab Technician

Techn. Employee | Physics Lab Technician (f/m/x) Optics manufacturing – Dresden Entry date: as of now

AXO DRESDEN develops and manufactures multilayer-based X-ray optics. With more than 20 years of experience, we deliver customized solutions for research and industry.

As a Technical Employee / Physics Laboratory Technician (f/m/x), you will be involved in the development, manufacture and testing of high-precision X-ray optical systems. You accompany our products from development to series production readiness and are a cooperative connection to many different areas within the company. There is a lot of technical and physical know-how in each of our X-ray optics. We are looking for a crafty colleague for our team who would like to take on these challenges.

Responsibilities:

- Manufacturing and assembly of high-precision X-ray optics and their components
- Execution, analysis, and documentation of measurements using test setups
- Development and testing of innovative technical solutions for X-ray optics
- Support in maintenance of machines and equipment
- Independent work within an interdisciplinary team
- Active participation in implementing production planning and quality assurance processes
- Support in shipment preparation
- Technical contact for suppliers and customers

Requirements:

- Relevant technical education: Physics Laboratory Technician, Physical-Technical Assistant or equivalent
- Good manual dexterity and precision for careful assembly and alignment of sensitive components
- Experience in conducting physical and technical experiments, including data acquisition and analysis
- Hands-on mentality and ability to work independently
- Strong communication skills and team orientation with good command of German and/or English
- Several years of experience in the field of optical systems preferred
- Class B driver's license

We offer you:

- Permanent full-time position in an internationally operating high-tech company
- Broad range of responsibilities, genuine scope for creativity, and short decision-making processes
- Value-oriented working environment that promotes collegial cooperation and encourages active participation
- Voluntary social benefits (e.g. company pension scheme, subsidized lunch and profit-sharing)
- Employer-subsidized public transport ticket and company bike leasing
- Vacation and Christmas bonuses
- Flexible working hours
